

Page 1 - Prototype Overview

Sprint 1 Prototype

This static prototype presents the planned Teaching Assistant Recruitment System for TA applicants, module organisers, and administrators. It focuses on a transparent recruitment workflow and local file-based storage rather than database integration.

Page 2 - TA Dashboard

Sprint 1 Prototype

The TA dashboard summarises profile readiness, current application usage, accepted offers, and recent notifications. It gives applicants immediate visibility into workload limits and application progress.

Page 3 - TA Profile And CV (Success Path)

Sprint 1 Prototype

The TA can maintain personal details, skills, and availability, and upload a valid CV file. This page represents the main successful profile setup flow.

CV uploaded successfully. Stored locally and linked through JSON metadata.

Page 4 - TA Validation Scenes

Sprint 1 Prototype

The prototype includes basic validation feedback for incomplete profile data and unsupported CV file types. These scenes support the coursework requirement for visible failure and validation paths.

Invalid CV upload

The screenshot shows the 'TA Profile And CV' form. The 'Applicant Profile' section is filled out with the following details:

- Full name: Yuyangchen Lang
- Student number: 231224453
- Email: yuyangchen.lang@gmail.co.uk
- Phone: +86 139 0000 0000
- Skills: Java, Python, VHDL, Object-Oriented Programming
- Availability: Available on Tuesday afternoon, Thursday evening, and Friday morning.

The 'CV Upload' section shows a file named 'YuyangchenLang_CV.pdf' has been uploaded. Below the file name, it states 'Accepted types in this system: PDF / DOC / DOCX'. A red error message is displayed: 'Invalid file type. Please upload a PDF, DOC or DOCX file.' The 'Upload valid CV' button is disabled, and the 'Show invalid upload' button is active.

Missing required fields

The screenshot shows the 'TA Profile And CV' form. The 'Applicant Profile' section is filled out with the following details:

- Full name: Yuyangchen Lang
- Student number: 231224453
- Email: yuyangchen.lang@gmail.co.uk
- Phone: +86 139 0000 0000
- Skills: Java, Python, VHDL, Object-Oriented Programming
- Availability: Available on Tuesday afternoon, Thursday evening, and Friday morning.

The 'CV Upload' section shows a file named 'YuyangchenLang_CV.pdf' has been uploaded. Below the file name, it states 'Accepted types in this system: PDF / DOC / DOCX'. The 'Upload valid CV' button is disabled, and the 'Show invalid upload' button is active. A red error message is displayed: 'Please complete all required fields before saving your profile.'

Page 5 - Browse Job Postings

Sprint 1 Prototype

The job list displays relevant postings with module codes, required skills, workload, and open or closed status. This improves transparency compared with the previous spreadsheet-based process.

Expected workload

6 hours / week

Description

Support weekly labs and guide students through Java exercises.

Knowledge requirements

Strong Java syntax, classes, arrays, exception handling, and lab support communication.

Optional AI Fit Summary

Future enhancement

Match score

88%

Strengths:

Strong Java background and prior lab support.

Missing skills:

No critical gap detected for this role.

Recommendation:

Good fit. Priority 1 or 2 is reasonable if workload remains below the cap.

This panel is optional and separate from the required MVP workflow.

Apply To This Job

Preference ranking

Priority 1

Motivation note

I have prior Java tutoring experience and can support weekly lab sessions.

Page 7 - Application Validation Scenes

Sprint 1 Prototype

The prototype demonstrates application feedback for successful submission, exceeding the three-application limit, and attempting to apply for a closed job. These scenes directly support acceptance criteria for validation handling.

Submitted successfully

The screenshot shows the 'Job Detail And Application' form. The 'Apply to This Job' section on the right has a 'Submitted successfully' status. The 'Application Summary' section on the left shows a progress bar at 88% and a message: 'Thank you for your application. We will contact you when we have more information about this role. Recommended: Check the 'Apply to this job' checkbox to receive updates about this role. The position is open and we accept applications from the requested skill set.'

Application limit reached

The screenshot shows the 'Job Detail And Application' form. The 'Apply to This Job' section on the right has a 'Limit reached' status. The 'Application Summary' section on the left shows a progress bar at 88% and a message: 'Thank you for your application. We will contact you when we have more information about this role. Recommended: Check the 'Apply to this job' checkbox to receive updates about this role. The position is open and we accept applications from the requested skill set.'

Closed job blocked

The screenshot shows the 'Job Detail And Application' form. The 'Apply to This Job' section on the right has a 'Closed job blocked' status. The 'Application Summary' section on the left shows a progress bar at 88% and a message: 'Thank you for your application. We will contact you when we have more information about this role. Recommended: Check the 'Apply to this job' checkbox to receive updates about this role. The position is open and we accept applications from the requested skill set.'

Page 8 - My Applications

Sprint 1 Prototype

The applications page makes outcomes visible through explicit statuses such as Under Review, Submitted, and Rejected. Rejected applications remain visible so that the recruitment process is more transparent for TA users.

Transparent status tracking replaces hidden spreadsheet workflow.

Refresh prototype status

Visible rejection rule: rejected applications remain visible instead of disappearing silently.

MODULE	PRIORITY	STATUS	NOTES
EIE2105 Digital Systems TA	Priority 1	Under Review	MO reviewing VHDL experience.
ECS5001 Data Analytics TA	Priority 2	Rejected	Role filled. Transparent rejection shown to TA.
EIE3320 Object-Oriented Programming TA	Priority 1	Submitted	Application submitted successfully.

Page 9 - MO Dashboard And Posting Management

Sprint 1 Prototype

The MO workflow supports job publishing, monitoring applicant numbers, and maintaining posting details such as skill requirements, workload, and deadlines.

MO dashboard

The MO Dashboard provides an overview of job postings and applicant management. It features a sidebar with navigation links and a main content area with summary cards and a list of job postings.

MO Dashboard Summary:

- Open postings:** 2 (linked to 14 applicants)
- Total applicants:** 10 (under review module)
- Pending review:** 2 (submitted or under review)

My Job Postings:

- Object-Oriented Programming TA** (Open)
 - Skills: Java, OOP, debugging
 - 4 applicants
 - Buttons: Open detail, Review applicants
- Digital Systems TA** (Open)
 - Skills: VHDL, Boolean logic, simulation
 - 2 applicants
 - Buttons: Open detail, Review applicants
- Data Analytics TA** (Closed)
 - Skills: Python, pandas, plotting
 - 4 applicants
 - Buttons: Open detail, Review applicants

Decision Support:

- See applicant skill summary beside each posting
- See current accepted job count before accepting a TA
- Close a posting to stop new applications
- Use clear reject status instead of silent rejection

Create or edit posting

The Create Or Edit Job Posting form allows users to manage job postings. It includes a sidebar, a main form area, and a publishing checklist.

Create Or Edit Job Posting Form:

- Module code:** ESE322
- Job title:** Object-Oriented Programming TA
- Required skills:** Java, OOP, debugging, student support
- Knowledge requirements:** Inheritance, polymorphism, arrays, classes, exception handling
- Weekly workload:** 4 hours / week
- Application deadline:** 24 March 2024
- Buttons:** Save posting, Close posting
- Feedback:** Job posting saved. It now appears in the open jobs list.

Publishing Checklist:

- Skill requirements are visible to TAs
- Deadline and workload are clearly shown
- Job can be closed by MO
- Posting appears on TA side after save

Page 10 - MO Review And Decision Update

Sprint 1 Prototype

The MO can review applicant skills, CV references, and current workload before marking an application under review, accepted, or rejected. This supports clear and traceable decision-making.

Clean review state

The screenshot shows the 'Applicant Review' interface. At the top, there are three buttons: 'Open Jobs' (3), 'Applications' (3), and 'Rejected' (0). The main content area is divided into two columns. The left column, titled 'Applicant Review', contains a table of applicants with columns for 'Applicant', 'Skills', 'Accepted Jobs', and 'Status'. The right column, titled 'Selected Applicant Detail', shows details for 'Yuyanchen Long', including their VMDL, CV path, and current accepted jobs. Below these columns is an 'Optional AI Review Support' section with a 'Fit summary' and 'Workload risk'.

Applicant	Skills	Accepted Jobs	Status
Yuyanchen Long	VMDL, simulation, digital logic	3 / 3	Under Review
Yuyanchen Long	Python, pandas, plots	2 / 3	Rejected
Yuyanchen Long	Java, OOP, debugging	0 / 3	Submitted

Selected Applicant Detail
Yuyanchen Long
VMDL, simulation, digital logic
CV path: uploads/cv/yuyanchenlong_cv.pdf
Current accepted jobs: 3 / 3
[Mark under review](#) [Accept applicant](#) [Reject applicant](#)

Optional AI Review Support
Fit summary: Skill alignment for EE212105 is based on VMDL, simulation, digital logic.
Workload risk: High workload risk. Acceptance would exceed the workload cap.
Suggested action: Reject or reassign due to workload overload.
Optional executive output only. Final decision remains with the MO.

Decision update visible

This screenshot is identical to the one above, but with a decision update. The 'Status' column in the table now shows 'Rejected' for the first applicant, 'Yuyanchen Long'. The 'Fit summary' and 'Workload risk' sections are also updated to reflect this change.

Applicant	Skills	Accepted Jobs	Status
Yuyanchen Long	VMDL, simulation, digital logic	3 / 3	Rejected
Yuyanchen Long	Python, pandas, plots	2 / 3	Rejected
Yuyanchen Long	Java, OOP, debugging	0 / 3	Submitted

Optional AI Review Support
Fit summary: Skill alignment for EE212105 is based on VMDL, simulation, digital logic.
Workload risk: High workload risk. Acceptance would exceed the workload cap.
Suggested action: Reject or reassign due to workload overload.
Optional executive output only. Final decision remains with the MO.

Page 11 - Admin Workload Dashboard

Sprint 1 Prototype

The administrator can view accepted assignments across all TAs, identify overload cases at the workload threshold, and use this information to support balanced allocation decisions.

Workload Overview

Threshold: 3 accepted jobs

2 TAs have reached the workload threshold. Review allocation before confirming more offers.

TA	ACCEPTED MODULES	COUNT	WORKLOAD STATUS
Yuyanchen Long	COMP5002, EIE3001, EIE2105	3	Overload risk
Ming Li	ECS4007	1	Balanced
Siyu Chen	ECS5001, EIE2105, EIE3320	3	Overload risk

Admin Actions

- View all accepted job records
- See workload count and course names per TA
- Identify overload risk before final allocation
- Use data transparency to contact MO or TA if needed

Page 12 - Optional AI Assist Concept

Sprint 1 Prototype

AI is presented only as a future enhancement, not a core MVP requirement. Possible features include skill-fit scoring, shortlist support, and workload-aware balancing advice.
